KORUTARO JOSHUA MWESIGWA

Debrecen, Hungary (open to remote) · joshuakorutaro05@gmail.com · Personal Website: **joshsworkspace.netlify.app** · github.com/sweetchimp · linkedin.com/in/joshua-korutaro

SUMMARY

Second-year Computer Science Engineering student at the University of Debrecen with hands-on experience across full-stack development — from internship work on production accounting systems to independently built SaaS products currently in use. Live projects and case studies featured on a personal website. Comfortable across the stack: React/Next.js frontends, Node.js/Django/Laravel backends, Prisma/PostgreSQL, and Docker-based deployment. Seeking a remote junior developer role.

EXPERIENCE

Software Developer Intern — Cygnus SmartSpace (Ardenfield) · *Jun 2026 – Aug 2026*

- Collaborated with a development team to build and maintain client websites and internal accounting system features for the Ardenfield platform
- Built frontend interfaces with React and Next.js, and backend logic with Python/Django and Laravel
- Worked with Prisma ORM, database migrations, and Docker as part of the team's shared development workflow

Intern — Tiscon Solutions

- Supported daily operations through data entry and analysis, developing strong attention to detail with structured data

Freelance Developer — Joshko Labs (independent practice) · *Ongoing*

- Delivered a full website and law firm management system for MAKLAID Advocates
- Design, develop, and deploy client websites and management systems end-to-end, from planning through production deployment

PROJECTS

S&D AgriHub — Farm Management System farmosagrihub.online

- Full-stack farm management platform tracking production, expenses, and profitability across livestock and crop enterprises
- Stack: React/Vite, Node.js/Express, Prisma, PostgreSQL; deployed on Railway
- Built dashboards, Excel/PDF export, and multi-enterprise profit tracking for a live farm operation

Alton's Hotel Management System altonhotels.netlify.app

- Web app for tracking hotel expenses, room/guest management, F&B sales, and profit reporting
- Stack: React, TypeScript, Tailwind CSS, with JWT-based role authentication

MAKLAID Advocates — Law Firm Website maklaidadvocates.com

- Marketing website and case/client management system for a law firm client
- Stack: Astro, TypeScript, Tailwind CSS; deployed on Netlify with SEO and security hardening

Mr. Mailer — AI Email Assistant — in progress

- AI-powered Gmail assistant that summarizes and prioritizes daily emails, drafts AI responses, and includes a calendar/meeting-notes planner
- Stack: Next.js, Prisma/MySQL, BullMQ/Redis, Groq API, Better Auth (Google/Microsoft OAuth)

EDUCATION & CERTIFICATIONS

BSc Computer Science Engineering — University of Debrecen · *2025 – 2028 (in progress)*

Certificate in Python for Data Science, AI & ML — Greenbridge School of Open Technologies · *Feb – Apr 2025 · Grade B*

SKILLS

JavaScript/TypeScript, Python, React, Next.js, Astro, Node.js/Express, Django, Laravel, Prisma, PostgreSQL, MySQL, Docker, Git, REST APIs, JWT Auth, AI/ML fundamentals
